

Biranchi Poudyal

RESPONSIBLE AI & AI GOVERNANCE RESEARCHER

Sydney, Australia · +61 466 413 999 · biranchiacademia@gmail.com

Portfolio: biranchipoudyal.com · LinkedIn: linkedin.com/in/biranchi-poudyal · Google Scholar / ORCID 0000-0002-7210-5480

EDUCATION

Doctor of Philosophy (PhD) in Generative AI — Ongoing (expected completion February 2027)

Charles Darwin University, Australia

Research focus: investigating the impact of generative AI on knowledge formation, learning processes and educational agency in contemporary pedagogy. Thesis: "The Role of Generative AI and Agency in the Epistemological Foundations of Contemporary Pedagogy."

Master's Degree in International Relations and Diplomacy (2017–2019)

Foreign Policy · Small States · Research Methodology — GPA 3.33/4. Thesis: "Nepal in Geopolitical Chessboard: Opportunities and Challenges."

Master's Degree of Arts in English Literature (2016–2018)

Academic Writing · Prose and Poetry · Literature — GPA 3.4/4. Thesis: "Rhetorical Analysis of Articles on the Millennium Challenge Corporation (MCC)."

Bachelor's Degree in Arts, BA (2012–2015)

Major: English · Social Work · Journalism — 60.00%. Academic research: "Woman Sexual Harassment in Workplace."

RESEARCH EXPERIENCE

Doctoral Researcher — Responsible AI & AI Governance

Charles Darwin University, Australia · Feb 2023 – present

Research the governance, assurance and responsible deployment of generative AI systems, using higher education as the primary evidence base. Designed and ran an institutional AI-governance stress test covering 75 scenario-based cases across five Australian universities, backed by human verification and audit records. Analyse scholarly literature, institutional policies and AI-assisted outputs using structured coding, evidence synthesis and source validation.

Research Fellowship

Institute of South Asian Studies, Sichuan University · March–July 2018

Research paper and presentation: "Game Theory Analysis of the Trade War Between the United States and China." Second research output, "Economic Prospect of Belt and Road Initiatives in Nepal," was later published (see Publications).

EMPLOYMENT

Generative AI Model Training — Internship

Neorise Pty Ltd, Australia · Sep–Oct 2023

Sourced and annotated training data for machine learning models; helped design AI interactions and human-AI interfaces; conducted user research and led user-testing sessions on generative AI model behaviour.

Content Writer

The Value Crew · May 2021 – June 2023

Developed content and copy across blogs, articles, social media, landing pages and email campaigns; optimised content for SEO and managed multi-project content delivery against marketing deadlines.

Senior Researcher and Writer

Pioneer Research Center Nepal · June 2019 – June 2023

Authored research reports, white papers and grant proposals; translated complex social-science research into accessible content; contributed publications and media content on behalf of the centre.

Freelance Writer and Researcher

Self-employed · 2016 – present

Ghostwriting, copywriting, independent research and publication support. Statement of Purpose (SOP) consultant — helped edit 5,000+ students' SOPs for university and visa applications to Australia, Canada, the UK, New Zealand and Germany.

PUBLICATIONS

Five peer-reviewed publications, two AI-governance preprints, one research-fellowship conference presentation, and professional op-ed writing for national and international outlets.

Peer-reviewed & preprints

- Poudyal, B. (2026). Stress-testing university AI governance: A prospective method for locating policy breakpoints. [arXiv preprint arXiv:2608.28925](https://arxiv.org/abs/2608.28925).
- Poudyal, B. (2026). Reclaiming epistemic agency: A critical framework for human-generative AI co-agency in education. [arXiv preprint arXiv:2608.26937](https://arxiv.org/abs/2608.26937).

- Poudyal, B. (2022). The op-ed articles on the Millennium Challenge Corporation (MCC) project: A rhetorical analysis. [*SCHOLARS: Journal of Arts & Humanities*, 4\(1\), 53–64.](#)
- Poudyal, B. (2022). Why Nepal matters in the geopolitical chessboard. [*Unity Journal*, 3\(01\), 13–26.](#)
- Bhandari, K. R., Thapa, A., Poudyal, B., & Bhattarai, L. (2021). Beyond triple bottom line: 4Ps framework for the sustainability of the firms. [*International Journal of Export Marketing*, 4\(4\), 328–345.](#)
- Poudyal, B. (2022). Geo-strategic prospects of Kathmandu-Terai/Madhesh Fast Track (Expressway) road project: From national unity to international connectivity. *KTFT Journal*, 2(1), 12–17.
- Poudyal, B. (2019). Economic prospect of Belt and Road Initiatives in Nepal. *KMC Research Journal*, 3, 35–44.
- Bhandari, K. R., Islam, N., Kohtamäki, M., Paul, J., Poudyal, B., Zamborsky, P., & Salo, J. (2025). Does differentiation strategy and its interplay with innovation ambidexterity pay off? [*SSRN Working Paper*.](#)

Professional & op-ed writing

- Poudyal, B. (2026). The degree is a lie we've agreed not to notice. [*Information Age, ACS*, 12 May 2026.](#)
- Poudyal, B. (2025). How AI chatbots can improve aged care. [*Information Age, ACS*.](#)
- Poudyal, B. (2025). The algorithm isn't thinking, you are. [*The Sydney Times*, 25 May 2025.](#)
- Regular opinion contributor: The Kathmandu Post (15+ pieces), My Republica (15+ pieces), The Himalayan Times (10+ pieces).

RESEARCH PROJECTS

- **Do University AI Policies Actually Decide Cases?** — A vignette-based test of whether the published policy environment at 20 Australian universities actually resolves common AI-assisted student behaviours, or leaves them ambiguous.
- **Testing How University AI Governance Holds Up Under Pressure** — A scenario-based method that tests whether a university's public AI-governance documents still produce an accountable decision as AI use moves from simple assistance toward more autonomous, delegated action.
- **Academic Integrity Decision Framework** — A six-question framework that structures fair, consistent decisions about student generative-AI use in assessment.
- **AI Policy Extraction System** — A Python pipeline using web extraction and the Gemini API to collect, structure and organise university AI-policy information, with human verification of every record.
- **Responsible Human–AI Content Workflow** — A documented, human-led workflow in which AI assists with drafting, organising, coding and formatting while humans remain responsible for meaning, accuracy, ethics and final approval.
- **Assignment Thinking Assistant (live tool)** — A live web tool that coaches students through structured thinking on an assignment — planning, questioning and evaluating their own reasoning — instead of generating answers for them.

TECHNICAL SKILLS

Python for research tooling and data extraction · Astro, TypeScript, Tailwind CSS · LLM-API-based structured data extraction (Gemini API) · Spreadsheet-based coding and data management

METHODS

Systematic and scoping literature review · Qualitative coding and thematic analysis · Discourse and document analysis · Comparative policy analysis and conceptual synthesis

PROFESSIONAL SKILLS

Persuasive copywriting across digital and print media · Editing and proofreading to publication standard · Translating complex ideas into clear, accessible language · Cross-functional collaboration with researchers, marketers and designers

AWARDS

First Runner-up — Research Article Writing Competition

Nepal Army Unity Journal

First Runner-up — Research Article Writing Competition

Nepal Army KTFT Journal, Volume II
